

For **installation of software GeneSpring** in your lab, please email your request to: [WeipingChen@niddk.nih.gov](mailto:WeipingChen@niddk.nih.gov) to get a password.

---

Greetings. You can down load the software from following link:

<http://www.silicongenetics.com/cgi/SiG.cgi/GSu75i/a.smf>

## **Your GeneSpring client installation password**

Please send your email to [WeiPingChen@niddk.nih.gov](mailto:WeiPingChen@niddk.nih.gov) for the client installation password. (O): 301-496-1265

## **GeneSpring client installation instructions:**

1. Get the latest version of GeneSpring by [clicking here](#), or if you already have GeneSpring, select "Update GeneSpring" from the Help menu.
2. Install and run the software.
3. The GeneSpring client installation password shown in the box above will be used to create a unique license key on each GeneSpring client. If this is a new installation of GeneSpring, paste the password into the licensing window that appears during installation. (If GeneSpring is already installed on your computer go to the GeneSpring Data folder, (for example: C:\Program Files\SiliconGenetics\GeneSpring\data) and rename the "LicenseKey.txt" to "LicenseKey\_bak.txt". Once you change the original LicenseKey.txt file and try to open GeneSpring, a box will appear telling you that you do not have a license file. It will ask you to enter the licensing information into the appropriate space in the box.)
4. At this point, copy and paste the entire GeneSpring client installation password given above into the licensing box and click OK. GeneSpring will start, and immediately contact the Concurrent License Server for an available seat.

This email and password(s) are for the sole use of the intended recipient(s) and may contain confidential information. Any unauthorized review, use, disclosure or distribution is prohibited.
